

Objectif

Apprendre à créer de l'IHM avec java Swing.

Exercice 1 :

```

package fsac.swing;

import java.awt.BorderLayout;
import java.awt.Dimension;
import java.awt.event.ActionEvent;
import java.awt.event.ActionListener;

import javax.swing.*;

public class SwingExercice1 extends JFrame {

  public SwingExercice1() {

    this.setTitle("Calculer");
    this.setSize(500, 200);
    this.setLocationRelativeTo(null);
    this.setDefaultCloseOperation(JFrame.DISPOSE_ON_CLOSE);

    JPanel contentPane = (JPanel)this.getContentPane();
    contentPane.setLayout(new BorderLayout());

    JTextField operand1TextField = new JTextField();
    operand1TextField.setPreferredSize(new Dimension(150, 22));
    JTextField operand2TextField = new JTextField();
    operand2TextField.setPreferredSize(new Dimension(150, 22));
    String options[] = {"+", "-", "x"};
    JComboBox<String> operateursComboBox = new
    JComboBox<>(options);
    JButton calculerButton = new JButton("Calculer");

    JPanel northPanel = new JPanel();
    northPanel.add(operand1TextField);
  }
}
  
```

```

        northPanel.add(operateursComboBox);
        northPanel.add(operand2TextField);
        northPanel.add(calculerButton);
        contentPane.add(northPanel, BorderLayout.NORTH);

        JLabel resultLabel = new JLabel("Résultat : Pas encore
calculé!");
        resultLabel.setHorizontalAlignment(JLabel.CENTER);
        contentPane.add(resultLabel, BorderLayout.CENTER);

        calculerButton.addActionListener(new ActionListener() {

            @Override
            public void actionPerformed(ActionEvent e) {
                double a =
Double.parseDouble(operand1TextField.getText());
                double b =
Double.parseDouble(operand2TextField.getText());
                switch
(operateursComboBox.getSelectedItem().toString()) {
                    case "+" : {
                        resultLabel.setText("Résultat : " +
(a+b));
                        break;
                    }
                    case "-" : {
                        resultLabel.setText("Résultat : " + (a-
b));
                        break;
                    }
                    case "x" : {
                        resultLabel.setText("Résultat : " +
(a*b));
                        break;
                    }
                }
            }
        });
        this.setVisible(true);
    }

    public static void main(String[] args) {
        new SwingExercice1();
    }
}

```

Exercice 2 :

```
import java.awt.BorderLayout;
import java.awt.GridLayout;
import java.awt.event.ActionEvent;
import java.awt.event.ActionListener;
import java.util.Calendar;

import javax.swing.*;
import javax.swing.border.EmptyBorder;

public class SwingExercice2 extends JFrame {

    public SwingExercice2() {

        this.setTitle("Calculer mon âge");
        this.setSize(500, 200);
        this.setLocationRelativeTo(null);
        this.setDefaultCloseOperation(JFrame.DISPOSE_ON_CLOSE);

        JPanel contentPane = (JPanel) this.getContentPane();
        contentPane.setLayout(new BorderLayout());

        JPanel northPanel = new JPanel();
        northPanel.setLayout(new GridLayout(3, 2, 10, 10));
        JTextField nomTextField = new JTextField();
        JTextField prenomTextField = new JTextField();
        JTextField dateTextField = new JTextField("aa");
        northPanel.add(new JLabel("Votre nom :"));
        northPanel.add(nomTextField);
        northPanel.add(new JLabel("Votre prénom :"));
        northPanel.add(prenomTextField);
        northPanel.add(new JLabel("Votre date Naissance :"));
        northPanel.add(dateTextField);

        JLabel resultLabel = new JLabel("Vous avez : ");
    }
}
```

```

JPanel southPanel = new JPanel();
JButton calculerButton = new JButton("Calculer");
southPanel.add(calculerButton);
calculerButton.addActionListener(new ActionListener() {

    @Override
    public void actionPerformed(ActionEvent e) {
        int annee = Integer.parseInt(dateTextField.getText());
        Calendar c = Calendar.getInstance();
        resultLabel.setText("Vous avez : "+ (c.get(Calendar.YEAR) - annee));
    }
});

contentPane.add(resultLabel, BorderLayout.CENTER);
contentPane.add(northPanel, BorderLayout.NORTH);
contentPane.add(southPanel, BorderLayout.SOUTH);

contentPane.setBorder(new EmptyBorder(10, 10, 10, 10));

this.setVisible(true);

}

public static void main(String[] args) {
    new SwingExercice2();
}

}

```

Exercice 3 :

```

import java.awt.*;
import java.util.Calendar;

import javax.swing.*;
import javax.swing.border.EmptyBorder;

public class SwingExercice3 extends JFrame {

    public SwingExercice3() {

        this.setTitle("Calculatrice");
        this.setSize(400, 200);
